INTRODUCTION

Senior strategic thought leadership specialising in emerging technologies, innovation & automation (MVP/CPS/ISEB) with over 18 years of international commercial experience within global organisations; including CA Technologies, Hitachi, Deutsche Bank, Lehman Brothers, Thomson Reuters, Siemens, Xerox, New Zealand Lotteries Commission, PlanIT (Sydney) and Unisys (iPSL).

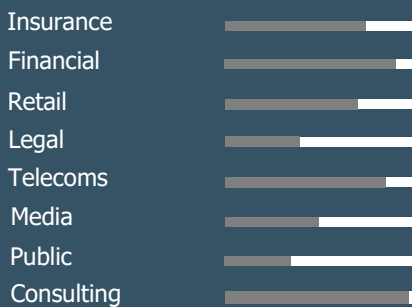

An enthusiastic knowledge leader, forward thinking and engaged in providing award-winning solutions within the challenging area of application delivery. However, my focus has been in automation - particularly in respect to DevOps (CA CDD, Microsoft Azure Stack & Docker), functional (HPE/Mercury, CA / Grid-Tools Agile Designer, Microsoft, Perfecto, Ranorex & Telerik), non-functional (HP/Mercury, Microsoft, CA BlazeMeter, & IBM GreenHat), lifecycle virtualization and management (HP Octane/ALM/SV/NV, Microsoft TFS/VSO, TeamCity, CA Agile Central, JIRA & Jenkins).

My recent focus has been on Cognitive Adoption (AI, Big Data & Machine Learning) & Digital Engineering (DevOps, Automation, Agile and Lean) presenting at international conferences (Gartner/ STARWest/STAREast/EuroSTAR/BCS SIGIST/ Swiss Testing Days/Unicom/HP Discover/CA World/ANZTB), online webinars, workshops and training courses. Leveraging proven approaches (Model-Driven Delivery / BDD / ATDD / Predictive ADM) within multi-modal delivery methodologies i.e. Lean Engineering, Disciplined Agile (SAFe v4.5, DAD, LeSS) or V-Model.
